## Free space in nature creates space for new thinking!

With "Walk & Talk" start each meeting in an unconventional way!

We will send you on an exciting excursion in the surroundings of your conference hotel. Search together and find the Walklines and Talkpoints in the field.

You work in the nature on seminar relevant topics and document the results for the rest of the seminar or training course.

In addition, we set team-building tasks that provide the conceptual free space to create new ideas.

When will you start your journey?
